

## Product Summary

**0418/RB** The fastest deploying oil boom on the planet.

### Benefits

- The oil spill first response system that immediately stops the spread of oil using advanced containment technology.
- Our lightweight and portable solution enables deployment within minutes by just two people, drastically reducing spill damage. With immediate containment capabilities, Ultra Rapid Boom controls the spill at its source, improving clean-up effectiveness.
- **Portable:** Lightweight and portable design supporting a rapid response - containment in minutes, not hours.
- **Easy Handling:** Easy-to-use and only requires two non-specialised personnel.
- **Convenient:** Instead of bringing people and equipment to site after the spill, the equipment is available on site for rapid deployment.
- **Immediate Response:** Contain marine oil spills immediately without heavy machinery or trained responders.
- **Better Containment:** Improves oil spill response effectiveness by containing oil when the spill occurs.
