

Product Summary

0424/AB/15

The Aqua Bag is a revolutionary water barrier or sandless sandbag providing against floods, water heater leaks, broken pipes, overflowing toilets and other liquid emergencies.

Benefits

- Sturdy construction - hydrophilic, non-woven fabric covers four layers of patented super-absorbent polymer.
- Quick acting - in minutes, these sandless sandbags absorb water to 90% capacity, preventing floods and leakage from causing damage to surrounding property.
- Easy-to-use and transport - Ultra-Aqua Bag sandless sandbags weigh less than a pound each and measure 17" x 22" before being activated with water.
- Superior water barrier/flood barrier - at full absorption Ultra-Aqua Bags provide between 30 to 40 pounds of flood stopping weight.
- Engineered consistency - designed and built to maintain a consistent shape throughout the bag.

Colour:	Blue
Weight:	7kg
